

# ODYSSEY<sup>®</sup>

**THE EXTREME BATTERY**

**2010 Automotive/LTV Battery Selection Guide**

***A different kind of battery,  
for a different generation of vehicles***

**ODYSSEY<sup>®</sup>**  
**THE EXTREME BATTERY**

When the time comes for a new battery, many people settle for whatever battery happens to be available at their local auto parts store or service station. And why not? All batteries are pretty much the same, right?

Not even close.

ODYSSEY<sup>®</sup> batteries have been designed to provide the kind of power required by today's energy-hungry cars and light trucks. Power not just for starting big, high-compression engines, but to power a long list of power-sapping accessories: entertainment and navigation systems; power windows, locks, mirrors, seats and sunroofs; engine management computers; hardtop convertibles, automatic shocks and more.

Because its plates are made of 99.99% pure virgin lead (unlike the lead alloy in most batteries), the ODYSSEY battery can pack in more plates. More plates mean more surface area, and much more power — twice the overall power and three times the life of conventional batteries — up to 400 cycles at 80% depth of discharge! Its completely sealed, leak-proof AGM design means it can be installed anywhere in the vehicle, except upside down.

Bottom line? The ODYSSEY battery delivers the massive starting power, rapid recovery and amazing deep cycling capability that today's vehicles demand.

# Safety Information

CCA - 880 • PHCA - 1500  
Reserve Capacity - 135 minutes  
Cyclic Charge Voltage: 14.4 - 14.8V @ 25°C  
Float Charge Voltage: 13.5 - 13.8V @ 25°C  
No Initial Charge Current Limit  
Terminal Torque - 6.8 Nm max (60 in.-lbs)  
Weight - 22.4 kg (49.5 lbs)  
www.odysseybattery.com

**ODYSSEY**  
THE EXTREME BATTERY

**34-PC1500**

**EnerSys**  
Manufactured by:  
EnerSys Energy Products Inc.,  
Warrensburg, MO 64093

**Pb**  
Sealed Lead Battery  
Must Be Recycled

**NONSPILLABLE**  
Drycell Battery  
Made in USA

**WARNING:**  
Battery posts, terminals, and related accessories contain lead and lead compounds, chemicals known by the State of California to cause cancer and reproductive harm. Batteries also contain other chemicals known to the state of California to cause cancer. Ventilate spaces where used or charged. If jump starting, refer to vehicle manufacturer's instructions. Not recommended for inverted use.

**⚠ DANGER/POISON**

SHIELD EYES! EXPLOSIVE GASES  
SULFURIC ACID  
FLUSH EYES IMMEDIATELY WITH WATER! GET MEDICAL HELP FAST

NO OPEN FLAMES OR SPARKS  
NO SMOKING  
NO DRINKING OR EATING  
NO BREATHING VAPORS  
NO CONTACT WITH SKIN OR CLOTHING

KEEP OUT OF REACH OF CHILDREN. WASH HANDS AFTER HANDLING.

## DANGER OF EXPLODING BATTERIES

Batteries contain sulfuric acid and produce mixtures of hydrogen and oxygen. Because self-discharge action generates hydrogen gas even when the battery is not in operation, make sure the batteries are stored and worked on in a well-ventilated area.

**Always wear safety glasses and a face shield when working on or near batteries.**

When working with batteries:

- Always wear proper eye, face and hand protection.
- Keep all sparks, flames and cigarettes away from the battery.
- Do not remove or damage vent caps.
- Cover vent caps with a damp cloth to minimize gas seepage.
- Make sure work area is well ventilated.
- Never lean over battery while boosting, testing or charging.

## SAFE BATTERY INSTALLATION

To assure safe installation and proper operation, follow these installation procedures.

- **Disconnect ground cable first** (this is usually the negative cable, however, older vehicles may have a positive ground).
- Remove old battery - note position of positive (+) terminal and negative (-) terminal. Mark the cables for correct connection to new battery.
- Clean terminals and cable connections with a wire brush. Broken connections or frayed or cut cables should be replaced.
- Install the replacement battery in the same position as the old one. **Be sure to secure battery with the hold-down assembly.**

- Make sure the terminals do not touch any metal mounting, engine or body parts.
- **Connect ground cable last to avoid sparks.** Connect cables tightly.

## DANGERS OF BATTERY ACID

In the unlikely event that an ODYSSEY® battery would leak electrolyte (for example, as a result of being punctured or crushed), extreme caution should be taken to avoid contact with this substance. Electrolyte, or battery acid, is a solution of sulfuric acid and water that can cause serious skin burns as well as destroy clothing or other materials with which it comes into contact. When handling electrolyte, keep an acid neutralizing solution nearby in case it is needed. Commonly available neutralizing solutions include baking soda or household ammonia mixed with water. Always follow these safety tips:

- Protect your eyes, face and hands with safety glasses and gloves.
- If electrolyte is splashed into an eye, force the eye open and flood it with clean, cool water for at least 15 minutes and immediately seek medical attention.
- If electrolyte is accidentally ingested, drink large quantities of water or milk. **DO NOT** induce vomiting. Seek **IMMEDIATE** medical attention.
- If electrolyte is spilled onto vehicle or in work area, neutralize the acid with baking soda and then rinse the contaminated area with water.
- When preparing electrolyte of a specific gravity, **DO NOT** pour water into the acid. Instead, pour the concentrated acid slowly into the water, stirring the water while adding small amounts of acid. In the event that the solution becomes noticeably heated, allow it to cool before continuing to add acid.

# Safety Information

## SAFE CHARGING

Before beginning the charging operation, read the instructions that come with the charger. **Never attempt to charge a battery without first reviewing the instructions for the charger being used.** In addition to the charger manufacturer's instructions, these general precautions should be followed:

- Always charge batteries in a well-ventilated area and **wear proper eye protection.**
- Turn the charger and timer "OFF" before connecting the leads to the battery to **avoid dangerous sparks.**
- Never try to change a visibly damaged or frozen battery.
- Connect the charger leads to the battery; red positive (+) lead to the positive (+) terminal and black negative (-) lead to the negative (-) terminal. If the battery is still in the vehicle, connect the negative lead to the engine block to serve as a ground. If the vehicle is positive grounded, connect the positive lead to the engine block.
- Make sure that the leads to the connections are tight.
- Set the timer, turn the charger on and slowly increase the charging rate until the desired ampere value is reached.

- If the battery becomes hot or if violent gassing or spewing of electrolyte occurs, reduce the charging rate or temporarily halt the charger.
- Always turn the charger "OFF" before removing charger leads from the battery to **avoid dangerous sparks.**

## SAFE BOOSTER CABLE OPERATION

When jump starting, always wear proper eye protection and never lean over the battery. Do not jump start a damaged battery; inspect both batteries before connecting booster cables. Be sure vent caps are tight and level, and place damp cloths over the vent caps for both batteries. Make certain that the vehicles are not touching and both ignition switches are turned to the "OFF" position.

1. Connect positive (+) booster cable to positive (+) terminal of discharged battery.
2. Connect other end of positive (+) cable to positive (+) terminal of assisting battery.
3. Connect negative (-) cable to negative (-) terminal of assisting battery.
- 4. Make final connection of negative (-) cable to engine block of stalled vehicle, away from the battery.**
5. Start vehicle and remove cables in **reverse** order of connections.

# Basic Battery Information

## HOW A BATTERY WORKS

A battery stores energy in chemical form that can be released on demand as electricity. This electrical power is used by the cars ignition system for cranking the engine. The car's battery also may power the lights and other accessories. Should the alternator or fan belt fail, the battery might also need to power the vehicle's entire electrical system for a short period of time.

## THREE THINGS TO CONSIDER WHEN BUYING A BATTERY

**1. SIZE:** What are the dimensions of your original equipment battery? The Battery Council International (BCI) uses a two or three digit number to identify the height, length, width and shape of original equipment sizes.

**2. POWER:** What are the Cold Cranking Amp (CCA) requirements of your vehicle? The power a battery can deliver decreases as the temperature gets colder. Batteries are rated at 0 degrees F. Using this rating for comparison, the higher the number, the greater the starting power of the battery.

**3. WARRANTY:** Automotive batteries are typically backed by limited warranties. These warranties generally include both free replacement and proration periods. You should look for warranties with the longest free replacement period.

**AS THE TEMPERATURE DROPS, MORE CRANKING POWER IS REQUIRED TO START A VEHICLE'S ENGINE, BUT A BATTERY'S AVAILABLE POWER DECREASES.**

Source: BCI service manual, 2002 edition

## Special Installation Instructions

### **GROUP 24/27 OPTIONAL HEIGHT ADAPTER FOR ODYSSEY® 34-PC1500 BATTERIES**

Optional height adapter may be used on 34-PC1500 models for installations where a group 24 or group 27 is required. Snap the adapter securely into place on the bottom of the battery. In some installations, the 34-PC1500 model with this adapter may be used to replace a group 24F or 27F depending on required cable length.

# ***Using the ODYSSEY® Battery Selection Guide***

---

This guide has been created to help ODYSSEY® battery distributors take advantage of the significant market for replacement batteries in the North American automotive aftermarket. In addition to information that will enable you to explain the unique advantages of ODYSSEY battery technology to your customers, the guide contains an up-to-date cross reference that makes it easy to find the correct replacement battery for most common automotive applications.

## **ESTIMATING BEST FIT REPLACEMENTS**

In some cases, complete battery replacement information is not readily available from vehicle manufacturers. To help you advise customers in these instances, the ODYSSEY Battery Selection Guide includes estimates of appropriate battery sizes. These sizes are estimates only, and it is advisable to caution customers to obtain specific battery size information for their replacement batteries.

## **USE OF HEAT SHIELDS**

In certain applications heat shields are used to protect batteries from extremely high temperatures. In such cases, failure to replace a heat shield after installation of a replacement battery may result in reduced life or compromised electrical performance. In applications where a heat shield is used, it might be necessary to choose a different battery of appropriate size to accommodate for terminal posts.

## **DISCLAIMER**

The replacement battery information contained in this guide has been obtained from vehicle manufacturers, except as otherwise noted. Although this information is the latest available at time of publication, users should note that this information is subject to change with periodic notice from equipment manufacturers and/or field experience. To help ensure that best fit replacements are recommended, ODYSSEY battery dealers/distributors should use the most current edition of the ODYSSEY Battery Selection Guide. For optimum safety, always check polarity and hood clearance!

Although every effort has been made to accurately catalog the replacement battery information contained in this guide, EnerSys®, the manufacturer of ODYSSEY batteries, expressly denies any responsibility for accuracy or the consequences of inaccurate replacement battery selection. EnerSys disclaims any warranties, expressed or implied, for the accuracy of the information in this guide, and denies any attempt to obtain replacement battery information from the equipment manufacturer's user manual or service department for their specific application.

# **ODYSSEY® Battery Limited Warranty Information**

## **WARRANTY:**

EnerSys Energy Products Inc. ("Manufacturer") warrants its ODYSSEY® batteries (hereafter referred to as "Battery") to be free of defects in material and workmanship for the earlier of (a) the Applicable Warranty Period or (b) within 400 cycles to 80% depth of discharge, whichever occurs first. The Applicable Warranty Period is two (2) years for power sports applications; three (3) years in automotive, marine, commercial, and industrial applications; and four (4) years in the case of the PC1220, 75-PC1230, 75/86-PC1230, PC1350, 25-PC1400, 35-PC1400, 34-PC1500, 34M-PC1500, 34R-PC1500, 34/78-PC1500, 78-PC1500, 65-PC1750, 31-PC2150, 31M-PC2150 and PC2250 batteries, except in APU (auxiliary power unit) applications, then warranty is two (2) years. The Applicable Warranty Period begins from the date of purchase with original receipt, or, if no receipt is available, from Manufacturer's shipping date. Within the Applicable Warranty Period, the Battery will be replaced free of charge if, at the discretion of Manufacturer, adjustment is necessary due to defect in material or workmanship (not merely discharged). Batteries for warranty replacement consideration are to be returned to the original supplying distributor/dealer. If not truly feasible, other ODYSSEY distributors/dealers can be approached but a warranty processing fee may be applied. This warranty may vary from country to country; contact your authorized ODYSSEY battery wholesaler or dealer for the applicable warranty.

## **GENERAL PROVISIONS:**

MANUFACTURER HAS NO OBLIGATION UNDER THE LIMITED WARRANTY SET FORTH ABOVE IN THE EVENT THE BATTERY IS DAMAGED OR DESTROYED AS A RESULT OF ONE OR MORE OF THE FOLLOWING:

- Willful abuse or neglect or if the top decorative cover has been removed.
- Natural forces such as wind, lightning, hail; damage due to fire, collision, explosion, vandalism, theft.
- Penetration or opening of the Battery case in any manner.
- Overcharging, undercharging, charging or installing in reverse polarity, improper maintenance, allowing the Battery to be deeply discharged via a parasitic load or mishandling of the Battery such as but not limited to using the terminals for lifting or carrying the Battery. Trickle chargers that do not have a regulated trickle charge voltage between 13.5V and 13.8V (no lower than 13.5V and no higher than 13.8V) will cause early failure of the Battery. Use of such chargers with the Battery will also void the Battery's warranty. For applications where an alternator is present, the alternator must deliver between 14.0V and 14.7V when measured at the battery's terminals. Alternators that do not have a regulated charge between 14.0V and 14.7V (no lower than 14.0V and no higher than 14.7V) will cause early failure of the Battery. Use of such alternators with the Battery will also void the Battery's warranty.
- Failure to properly install the Battery or lack of metal jacket for high temperature or vibration applications.
- Normal deterioration in the electrical qualities or the acceleration of such deterioration due to conditions that accelerate such deterioration.

- If the Battery is used for an application that requires higher cranking power or a greater reserve rating than the Battery is designed to deliver, or the Battery capacity is less than the Battery capacity specified by the vehicle manufacturer, or the Battery is otherwise used in applications for which it was not designed.
- Prolonged storage of vehicles with fuel injection computers, alarms, GPS and other electrical devices that require continuous battery power to support active memories; this power drain must be offset with a maintenance-float charger, periodic charging or disconnecting the battery to prevent the establishment of irreversible crystallized sulphation in the battery plate oxide. Failure to address this destroys battery capacity and voids the warranty, as this is not a warranted defect in materials or workmanship. A battery with an open circuit voltage (OCV) of equal to or less than 10.0V will be deemed as overdischarged and void from warranty due to misuse and/or neglect.
- **WARNING** - Do NOT use any type of oil, organic solvent, alcohol, detergent, strong acids, strong alkalis, petroleum-based solvent or ammonia solution to clean the jars or covers. These materials may cause permanent damage to the battery jar and cover and will void the warranty.

## **TO OBTAIN WARRANTY SERVICE:**

1. Return the Battery to any authorized ODYSSEY battery wholesaler or dealer.
2. If the Battery is determined by Manufacturer, in its sole discretion, to be defective for material or workmanship under terms of this limited warranty, it will be replaced.
3. Manufacturer's acceptance of any items shipped to Manufacturer shall not be deemed an admission that the items so shipped are defective. Any items shipped back to Manufacturer, shall in Manufacturer's sole discretion, become Manufacturer's sole property.

THIS LIMITED WARRANTY IS IN LIEU OF, AND MANUFACTURER DISCLAIMS AND EXCLUDES ALL OTHER WARRANTIES, STATUTORY, EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. MANUFACTURER'S EXCLUSIVE LIABILITY FOR BREACH OF WARRANTY SHALL BE TO REPLACE THE BATTERY WITHIN THE EFFECTIVE WARRANTY PERIOD. IN NO EVENT SHALL MANUFACTURER BE LIABLE FOR ANY LOSS OR DAMAGES OF ANY OTHER KIND, WHETHER DIRECT, INCIDENTAL, CONSEQUENTIAL, EXEMPLARY, SPECIAL OR OTHERWISE. NOR SHALL MANUFACTURER BE LIABLE FOR ANY REMOVAL OR INSTALLATION EXPENSE, OR THE LOSS OF TIME OR PROFITS.

Some countries and/or states do not allow limitation on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above limitations may not apply to you. This warranty gives you specific legal rights, which may vary from country to country and/or state to state.

# **ODYSSEY® Battery Benefits**

## **BETTER WARRANTY**

Limited 3- and 4-year full replacement warranty – not pro rata.

## **LONGER SERVICE LIFE**

With 3-10 years of service life, ODYSSEY® batteries save consumers time, money, and aggravation.

## **LONGER CYCLE LIFE**

70% longer cycle life compared to conventional deep cycle batteries – up to 400 cycles at 80% depth of discharge – high stable voltage for longer periods of time.

## **LONGER SHELF LIFE**

Can be stored on open circuit (nothing connected to the terminals) without the need for recharging up to 2 years or down to 12.00V, whichever occurs first.

## **FASTER RECHARGE**

The highest recharge efficiency of any sealed lead battery on the market – capable of 100% recharge in 4 - 6 hours.

## **MOUNTING FLEXIBILITY**

Non-spillable design – can be mounted on any side in any position except upside down.

## **VIBRATION RESISTANCE**

Design protects against high impact shock and mechanical vibration – a common cause of premature battery failure.

## **EXTREME TEMPERATURE TOLERANCE\***

Operating temperatures from -40°C (-40°F) to 80°C (176°F).

## **TOTALLY MAINTENANCE FREE**

No need to add water, ever! Drycell design with resealable venting system.

## **IMPROVED SAFETY**

US Department of Transportation classified as a ‘non-spillable,’ ‘non-hazardous’ battery. No acid spills, no escaping gases. Please reference our MSDS sheet for complete details at [www.odysseybattery.com](http://www.odysseybattery.com).

\* Some models require metal jackets.

# ***Charging and Winter Storage***

## **CHARGING**

The state of charge in a ODYSSEY® battery can be determined from the following chart:

| <b>Voltmeter Reading</b> | <b>State of Charge</b> |
|--------------------------|------------------------|
| 12.84 Volts or higher    | 100%                   |
| 12.60 Volts              | 75%                    |
| 12.18 Volts              | 50%                    |
| 11.88 Volts              | 25%                    |

## **Racing Vehicles using total loss (no alternator)**

Standard automotive type chargers are not designed to return 105-108% of the energy removed. They normally boost charge to 80-95% and expect the alternator to complete the charge. ODYSSEY Ultimizer™ Chargers listed on our website at **[www.odysseybattery.com](http://www.odysseybattery.com)** are specifically designed for ODYSSEY batteries that are routinely deeply discharged. They provide the 105-108% recharge and then switch to float charge.

It is important not to exceed 15.0V as this will cause the pressure valves to open and out-gas hydrogen, oxygen and water from inside the battery. This will shorten the life of the battery and cause premature failure. Some portable chargers exceed 15.0V, especially two-wheel garage chargers, so charging voltages should be verified by measuring the charging voltage during the time when the charging amperage is reducing from full output. The deep cycle charging voltage must be within 14.4V minimum to 14.7V maximum.

If a standard automotive charger is used to boost charge a discharged battery because of an accessory left on, it is important to make sure the charging voltage does not exceed 15.0 volts during charge. A hand held voltmeter can be used to monitor this periodically. The following chart provides recharge times under this type of boost charging to an 80-95% recharge and then allows the vehicle charging system to complete the charge.

## **WINTER STORAGE**

ODYSSEY batteries can be stored for 2 years at 77°F. To store off-season, measure the battery voltage to make sure it is fully charged, 12.84 volts or greater; recharge if necessary. Disconnect the negative battery cable to prevent any applied electrical load during storage. ODYSSEY batteries cannot freeze down to -40°C or -40°F so it can be left in the vehicle.

A 12V, 1-3 amp trickle charger or maintainer can also be left connected to the battery if it is kept in storage for extended periods or if the battery is subject to parasitic loads during storage. The recommended float charge voltage is 13.5V to 13.8V. Information on two such chargers we recommend, including where to buy them, can be found on our website at **[www.odysseybattery.com](http://www.odysseybattery.com)**.

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

| 1988-1986                | 2.2 Liters 2226 CC L5                  | 41             | PC1200MJT              |                | 4     |

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

| 2003-1996                 | 6.7 Liters 6748 CC V8                                  | 91             | PC1200MJT              |                | 4     |

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity.
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity.
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

| 1984-1983                 | 2.6 Liters 2555 CC L4 U.S.                        | 25             | 25-PC1400T             |                |       |

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity.
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

| 1972                            | 5.0 Liters 302 CID V8                | 22F            | PC1200MJT              |                | 4     |
| 1972                            | 5.0 Liters 302 CID V8 Optional       | 27F            | 34R-PC1500T            | Yes            | 1     |

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

| 1990-1988                       | 7.4 Liters 454 CID V8                      | 78             | 78-PC1500              |                |       |

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

| 1957                            | 5.1 Liters 312 CID V8                       | 29NF           | PC925MJT               |                | 2     |
| 1957                            | 5.1 Liters 312 CID V8 Optional              | 32N            | N/A                    |                |       |

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

| 1969                            | 7.0 Liters 428 CID V8 Optional                             | 24T            | 34-PC1500T             | Yes            | 1     |

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

1. Installation requires optional height adapter. Additional cable may be required.
2. Installation requires battery to be placed on its side to dimensionally fit. Vehicle battery restraint(s) may require modification.
3. Installation requires reverse mounting orientation for correct terminal polarity
4. Vehicle battery restraint(s) may require modification.
5. Installation requires additional interbattery cables for parallel connections.
6. If vehicle as Intelligent Key option, then use 34R-PC1500T with the optional height adapter. Additional cable may be required.
7. If vehicle as Intelligent key option, then use 35-PC1400T

## NOTES:

- \*1 Installation requires reverse mounting orientation for correct terminal polarity
- \*2 Installation requires battery side mount for correct terminal polarity
- \*3 Installation requires additional interbattery cables for parallel connections
- \*4 Installation requires battery to be placed on its side to dimensionally fit
- \*5 Installation requires optional height adapter. Additional cable may be required.
- \*6 Installation requires optional height adapter and reverse mounting orientation for correct terminal polarity. Additional cable may be required.
- \*7 Installation may require vehicle battery restraint(s) modification.

ODYSSEY Batteries are universal in fit and may require non-OEM hold down brackets or spacers  
All batteries available with metal jackets, except PC1220 and PC1350

# ***Frequently Asked SLI Battery Questions***

---

## **WHAT IS THE CCA RATING?**

The cold cranking ampere (CCA) rating refers to the number of amperes a battery can deliver for 30 seconds at a temperature of -18°C (0°F) before the voltage drops to 1.20 volts per cell, or 7.20 volts for a 12V battery. A 12V battery that has a rating of 550 CCA means that the battery will provide 550 amps for 30 seconds at -18°C (0°F) before the voltage falls to 7.20V.

## **WHAT IS THE MCA RATING?**

The marine cranking ampere (MCA) rating refers to the number of amperes a battery can deliver for 30 seconds at a temperature of 0°C (32°F) until the battery voltage drops to 7.20 volts for a 12V battery. A 12V battery that has a MCA rating of 725 MCA means that the battery will give 725 amperes for 30 seconds at 0°C (32°F) before the voltage falls to 7.20V. The MCA is sometimes called the cranking amperes or CA.

## **WHAT IS A HCA RATING?**

The abbreviation HCA stands for hot cranking amps. It is the same as MCA, CA or CCA, except that the temperature at which the test is conducted is 26.7°C (80°F).

## **WHAT IS THE PHCA RATING?**

Unlike CCA and MCA the pulse hot cranking amp (PHCA) rating does not have an “official” definition; however, we believe that for true SLI purposes, a 30-second discharge is unrealistic. The PHCA, a short duration (about 3-5 seconds) high rate discharge, is more realistic. Because the discharge is for such a short time, it is more like a pulse.

## **ARE THESE GEL CELLS?**

No, the ODYSSEY® battery is NOT a gel cell. It is an absorbed electrolyte type battery, meaning there is no free acid inside the battery; all the acid is kept absorbed in the glass mat separators. These separators serve to keep the positive and negative plates apart.

## **WHAT IS THE DIFFERENCE BETWEEN GEL CELL AND AGM?**

The key difference between the gel cell and the absorbed glass mat (AGM) is that in the AGM cell all the electrolyte is in the separator, whereas in the gel cell the acid is in the cells in a gel form. If the ODYSSEY battery were to split open, there would be no acid spillage! That is why we call the ODYSSEY battery a Drycell™ battery.

## **WHAT IS THE Ah RATING?**

The ampere-hour (Ah) rating defines the capacity of a battery. A battery rated at 100Ah at the 10-hour rate of discharge will deliver 10A for 10 hours before the terminal voltage drops to a standard value such as 10.02 volts for a 12V battery. The PC1200 battery, rated at 40Ah, will deliver 4A for 10 hours.

## **WHAT IS RESERVE CAPACITY RATING?**

The reserve capacity of a battery is the number of minutes it can support a 25-ampere load at 27°C (80°F) before its voltage drops to 10.50 volts for a 12V battery. A 12V battery with a reserve capacity rating of 100 will deliver 25 amps for 100 minutes at 80°F before its voltage drops to 10.5V.

## **IS THE ODYSSEY BATTERY A DRY BATTERY?**

Because the ODYSSEY battery has no free acid inside, it is exempted from the requirements of 49 CFR § 173.159 of the US Department of Transportation (USDOT). The battery also has a “nonspillable” classification and falls under the International Air Transport Association (IATA) “unrestricted” air shipment category. These batteries may be shipped completely worry-free. Supporting documentation is available. Short circuit protection required. Please refer to our MSDS sheet for complete details at [www.odysseybattery.com](http://www.odysseybattery.com).

# ***Frequently Asked SLI Battery Questions***

---

## **WHAT IS IMPEDANCE?**

The impedance of a battery is a measure of how easily it can be discharged. The lower the impedance the easier it is to discharge the battery. The impedance of the ODYSSEY® battery is considerably less than that of a conventional SLI battery, so its high rate discharge capability is significantly higher than that of a conventional SLI battery.

## **WHAT IS THE SHORT-CIRCUIT CURRENT OF THESE BATTERIES?**

As mentioned before, this battery has very low impedance, meaning that the short circuit current is very high. For a PC925 battery, the short circuit current can be as high as 2,500 amperes.

## **DO I RUIN THE BATTERY IF I ACCIDENTALLY DROP IT?**

Not necessarily, but it is possible to damage the internal connections sufficiently to damage the battery.

## **DOES MISHANDLING THE BATTERY VOID THE WARRANTY?**

Our warranty applies only to manufacturing defects and workmanship issues; the policy does not cover damages suffered due to product mishandling. Refer to the product warranty for details.

## **WHAT IS SO SPECIAL ABOUT THIN PLATE PURE LEAD TECHNOLOGY? IS IT A NEW TECHNOLOGY?**

The answer lies in the very high purity of our raw lead materials, making our product very special. The technology is not new; the sealed lead recombinant technology was invented and patented by us back in 1973.

## **WHY DON'T YOU HAVE TO WINTERIZE YOUR BATTERIES? WHAT'S SO SPECIAL ABOUT THEM?**

In general, winterizing refers to a special maintenance procedure conducted on an automotive engine to ensure its reliability during the winter season. The procedure essentially checks the engine's charging system; in addition, the battery is load tested according to a specific method defined by the Battery Council International (BCI). Although ODYSSEY batteries do not specifically require this test to be conducted on them, the final decision whether or not to conduct this test is left to the user's discretion.

## **ARE THESE Ni-Cd BATTERIES? WHY DOESN'T SOMEBODY MAKE THESE IN Ni-Cd? WOULDN'T THEY CHARGE FASTER AS A Ni-Cd?**

No, the ODYSSEY battery is NOT a Ni-Cd battery. It is a valve regulated lead acid (VRLA) battery. In general, Ni-Cd batteries are much more expensive to manufacture and recycle, so they are less cost effective than a lead acid product.

A Ni-Cd battery would charge faster than a conventional lead acid battery; however, the ODYSSEY battery is NOT a conventional battery and its charge characteristics are somewhat similar to nickel cadmium batteries. In fact, with a powerful enough charger, it is possible to bring ODYSSEY batteries to better than 95% state of charge in less than 20 minutes! That is very comparable to the fast charge capabilities of nickel cadmium product.

# ODYSSEY®

## THE EXTREME BATTERY

### **Robust Intercell Connections**

Built to stringent specifications, cell connectors are casted to the plates, and bonded to resist vibration and eliminate internal sparking.

### **Tin Alloy Coated Brass Terminals\***

Brass terminals coated with a high-quality tin alloy ensure secure, corrosion-free cable connections.

### **Sealed Design**

Gases recycled internally during operation or charging. Each cell has safety relief valve.

### **Pure Lead Plates**

Constructed from 99.99% pure virgin lead, ODYSSEY battery plates are extremely thin, so more of them can fit into the battery. More lead plates equals more power.

### **Compressed AGM Plate Separators**

Before being inserted into the case, the Absorbed Glass Mat plate separators are compressed for extreme vibration resistance.

**ODYSSEY® batteries vs. spiral-wound designs:  
15% more plate surface area!**

**Unused battery space**

\*except the PC1220 and PC1350

## ***About EnerSys®***

EnerSys® is a global leader in stored energy solutions for automotive, military, and industrial applications. With manufacturing facilities in 17 countries, sales and service locations throughout the world, and over 100 years of battery experience, EnerSys is a powerful partner for automotive service and parts providers.
